HISTORISCHES ERBE «MAGGIORINA»

Hugh Johnson Pocket Wine Book 2017

Gattinara Pie DOCG r ** -> *** 04' 06 07 08 09 10 11 12 (13) (15).

Best-known of a cluster on n PIE DOC(G) based on NEBBIOLO, here called Spanna. Best producers Travaglini, Antoniolo, Bianchi, Nervi, Toraccia del Piantivigna. Similar DOC(G), s of the zone; Ghemme, Boca, Bramaterra, Colline Novaresi, Costa della Sesia, Fara, Lessona, Sizzano. None of them, sadly, measure up to BAROLO/BARBARESCO at their best.

**Wie hat alles geändert mit Le
Piane in Boca!**

Hugh Johnson Pocket Wine Book 2022

Alto Piemonte Pie Cradle of PIE quality in C19 (40,000 ha vyds).

Acidic soil, exposure, climate and altitude diversity, ideal for many different NEBBIOLO expressions (here called Spanna). Main DOC(G) : BOCA, BRAMATERRA, Colline Novaresi, Coste della Sesia, FARA, GATTINARA, GHEMME , LESSONA, Sizzano, Valli Ossolane. Many outstanding wines. Actually, rarely 100% Nebbiolo: small additions of Croatina, Una Rara, Vespolina common.

Boca Pie DOC See ALTO PIEMONTE . Potentially among greatest reds. NEBBIOLO (70 - 90%), incl. up to 30% Uva Rara and/or Vespolina. Volcanic soil. Needs long ageing. Best: Le Piane. Gd: Carlone Davide, Castello Conti.

Le Piane Pie *** BOCA DOC resurfaced thanks to Christoph Kunzli. Gd: Maggiorina, Mimmo (NEBBIOLO /Croatina), Piane (Croatina), (w) Bianco (Erbaluce) 2

VOR COVID und dann war das normale Leben vorbei, aber wir haben nicht aufgegeben sondern unsere Zeit genutzt um wichtige Investitionen in Le Piane zu vollziehen und uns auf den Neustart vorzubereiten.

Neuer Weinberg in Traversagna: Mottornovo – aus dem Wald geschlagen.

MOTTORNOVO WEINBERGE

Weitere schöne
Häuser warten auf
ihre Zukunft

Auch unser Nachbar und Traubenlieferant Davide Carlone hat nicht gestoppt sondern eine grossartige Lage in Traversagna mit 2 Ha wiederbepflanzt.

ACTIVITY CERTIFICATE
for the year 2021

Presented to

Le Piane Srl

DiversityBio is a virtuous path of study and monitoring of the vineyard balance. An agro-ecological project not bound to a particular conduction, but to the company's commitment to the protection of the vineyard agro-ecosystem, in order to promote the naturalness of the productions.

We here by certify that the company Le Piane Srl has performed the following activities of high technical and scientific profile during the year 2021 in company's vineyards:

1. Analysis of the following soil fertility indexes:

- Microbial Biomass Analysis, measuring the amount of microorganisms in the soil;
- Metabolic quotient, assessing the quality of respiration (CO2 emission) of microorganisms;
- Estimated Biomass: it establishes the reference value for each individual plot of land by virtue of an innovative forecasting model;
- Soil chemical-physical analyses.

2. Description of species, variability, and entomological balances:

- Biodiversity Index, classifying the overall morphospecies present on site;
- Pollinators Biodiversity, classifying the overall morphospecies present on site;
- Biological Control Index, to define the relationship between prey and predators.

3. Analysis and description of the following Botanical Indexes:

- Biodiversity Index, classifying the number of entities present on site (families and genera);
- Floristic contamination, to quantify and describe the presence of alien (non-native) species;
- Grass Cover Quality, to quantify and describe the coverage in space of the soil surface by spontaneous grassing.

4. Diversitybio vineyard data sheet implementation:

- Employment of visual and synthetic indicators;
- Summary calculation of the agro-ecological score achieved by means of all the analyses performed.

All activities were performed by applying standardized, scientifically established and validated methods of sampling, laboratory analysis and evaluation. The samples and the results were processed and analyzed by highly qualified and specialized agronomists, botanists and entomologists.
