COMPETITION FOR YOUNG FASHION DESIGNERS

Creazione e Immagine, a cultural association with headquarters in Cosenza, presents the **28th edition** of **Moda Movie**, the **festival** born in 1997 from the idea of celebrating and deepening the relationship between the world of Fashion, Cinema and Arts.

As part of the festival there is a **competition for young fashion designers** that aims to **valorize** and **promote** the **emerging talents** of the fashion world and give them a chance to **compare, training, professional growth** and **visibility**.

For each edition of the festival is identified a **theme of interest** to which are addressed the call for competition for fashion designers, the activities related to the cinema, as well as all the different collateral events that make up the entire event.

The 2024 edition of Moda Movie aims to raise awareness communities towards **the sustainable use of resources**. For this reason, it was decided to highlight **environmental, cultural and tourism issues in the direction of circular economy models**.

It has been highlighted in several parts - in particular in the specific documents of the EU Parliament of 2020 - that **the textile sector has been the third source of degradation of water resources and land use**. In that year, an average of 9 cubic metres of water, 400 square metres of soil and 391 kilograms of raw materials were needed to provide clothing and shoes for every EU citizen.

As part of the action plan for the circular economy, in March 2022 the European Commission presented **a new strategy to make fabrics more durable, repairable, reusable**. By 2030, according to the Communication of the European Commission, textile products placed on the EU market must be durable and recyclable, largely made from recycled fibres, free of hazardous substances and products, in accordance with social and environmental rights.

In a competitive, resilient and innovative textile industry, manufacturers will therefore take responsibility for their products throughout the product life chain, even when they become waste and consumers will be able to benefit from high-quality textile products at affordable prices and cost-effective re-use and repair services.

It is therefore a question of directing production towards a **circular textile ecosystem** and, at the same time, of limiting the use of incineration and the landfilling of textiles to a minimum.

To the participants in the contest we ask, taking into account the intrinsic characteristics of the fashion system and the life cycle of a product, to direct the design of their creations using natural fabrics, with low environmental impact and cruelty free.

An added value could be the valorization of techniques or craftsmanship tied to a specific territory or the use of accessories deriving from the processing of eco-sustainable materials.
