Loose-leaf blend

For a full and natural taste.

High yield

And maximum versatility.

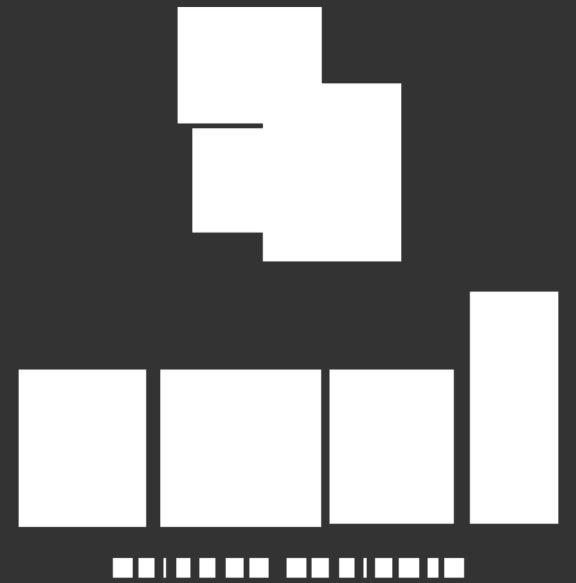

Premium format

For a discerning and selective clientele.

MOQ

6 pcs. per product.

THE BLENDS

Lava

Orange, Apple, Calendula, Chili Pepper.

Description

A herbal infusion with an intense citrus flavour, blending the essences and aromas of some of the most characteristic fruits of the Mount Etna area: orange and diced apple.

The fruity flavour pairs beautifully with the sweet notes of calendula flowers, harvested among Etna's terraced landscapes, and the rustic spiciness of chili pepper, creating a precious blend for harmony of body and spirit, ideal for cold winter days.

Neve

Couch Grass, Yarrow, Mint, Fennel.

Description

A light and delicate herbal infusion, ideal for those seeking gentle and wholesome botanical blends. The mildly herbaceous flavour of couch grass rhizomes and white yarrow flowers, plants widely found at different altitudes across the Mount Etna area, combines with the aromatic notes of mint and fennel. The result is an intense yet balanced blend that immediately delivers a fresh sensation of well-being.

Fumo

Helichrysum, Sage, Lavender, Olive.

Description

A herbal infusion with a distinctive character, where the aromatic and fragrant notes of helichrysum flowers and lavender calyces blend harmoniously with the bitter notes of olive and sage leaves.

The characteristic grey-green colour and the restorative flavour of this blend capture all the sensations of a deep Mediterranean breath, offering an intense tasting experience.

Bosco

Chestnut, Bramble, Oak, Broom.

Description

This herbal infusion brings together some of the most characteristic elements of Mount Etna's woodlands, combining chestnut and wild bramble leaves, oak bark and the flowers of yellow broom, the symbolic plant of the Volcano.

With its tannic and astringent character, this infusion is ideal for warming up on rainy autumn days or during the cold winter months, offering comfort and vitality.

Sottobosco

Rose Hip, Hazelnut, Ivy, Pine.

Description

An infusion that speaks the language of Mount Etna's woodland undergrowth: rose hip brings a lively touch of acidity, chopped hazelnuts add warm roasted notes, ivy contributes an enveloping herbal character, while pine buds provide a distinctive touch of freshness and sweetness.

A clean and harmonious cup, ideal for cold evenings, offering a gentle and lingering warmth.
