*The pleasure of being in Nature*

**HERBAL TEAS**

# Natural Herbal Teas

All our aromatic and medicinal herbs are certified organic and are harvested to make functional herbal teas that are practical, tasty and beneficial to a person's health and routine. All herbal teas are free of any additives.

**IT-BIO-005**

**Agriculture in Italy**

# Local Endemisms

Various ingredients of our herbal tea blends are selected from botanicals from the Etnean and Sicilian districts. All Sari herbal teas are intended to represent the characteristic elements of Etna, through colours and flavours that evoke the landscape of the volcano.

# Formats for all Sales channels

- Single-use : for activities such as SPAs, pubs, congresses, airliners, gadgets as welcome gifts, corporate gifts, hotels.
- 6 Filters : resale, specialised shops, B2C, HORECA.
- 10 Filters : resale, specialised shops, B2C, HORECA.
- Loose : HORECA, loose product shops

# Single-use size

# 6-filter size

# 10-filter size

# Loose size

# CLOSE TO THE ENVIRONMENT, ALWAYS!

All packages are lightweight and easily transportable. They have been studied, designed and chosen to be 100% compostable (disposable cup, 6-filter cup) or recyclable (doypack, bulk).

AAA  
Recyclability

# Why we chose the doypack

The typical shelf-ready pack comes with **four layers of packaging** for just 10–15 g of product:

1. teabag (1–1.5 g) with string and tag,
2. individual overwrap sachet,
3. paper box,
4. outer plastic film wrapping the box.

**The result:** too many materials, too many steps, too much waste.

**sari**  
AZIENDA AGRICOLA

# The Sari solution

Less packaging, more infusion.

1. Primary packaging: teabag without string or tag.
2. Secondary packaging: 100% recyclable doypack containing 10 teabags of 2 g each.

**THE  
MIXTURES**

# Lava/

LAVA

A herbal tea with an intense, citrusy flavour, a blend of essences and fragrances derived from the most typical fruits of the Etna region: orange and apple in grain. The fruity flavour is perfectly matched by the sweet notes of marigold flowers, picked from Etna's terraces, and the rustic spicyness of chilli peppers, creating a precious remedy for harmony of body and spirit, ideal on cold winter days.

**Ingredients:** Orange, Apple, Marigold, Chilli.

**PRODUCT CODES**

**Single-use:** MONO01

**6 filters:** FILTRI01

**10 filters:** DOY01

**Loose 1 kg:** SFUSO01

## LAVA

In addition to the pleasure of taste, each herbal tea ingredient offers specific benefits for the well-being of the body:

- **Orange:** remineralising and anti-aging, it aids digestion and the elimination of intestinal gas thanks to its gastric and eupeptic action.
- **Apple:** promotes the well-being of the stomach, regulates intestinal transit and contributes to a healthy circulatory system. Thanks to the presence of pectin and other substances that reduce cholesterol absorption, it helps protect the arteries and, consequently, the heart. In addition, its high vitamin C content supports the immune system.
- **Marigold:** known for its emollient and lenitive properties on the mucous membranes, it is useful for combating menstrual pain, promoting the well-being of the liver and digestive system, as well as supporting skin health.
- **Chilli:** promotes blood circulation and metabolism.

Thanks to this unique combination, the herbal tea not only offers an enveloping sensory experience, but can also be an ally for digestive well-being. Its formulation helps counteract the effects of alcohol and offers a soothing and emollient action, adapting to the needs of body and mind. However, caution is advised for those suffering from acute gastritis or other gastrointestinal sensitivities.

# Neve/

SNOW

A herbal tea with a sweet and light taste, perfect for those looking for delicate and healthy blends of essences in nature. The slightly herbaceous flavour of the rhizomes of wheatgrass and the white flowers of yarrow, plants that are widespread at different altitudes in the Etna region, is combined with the aromatic scent of mint and fennel to create an intense combination that immediately gives a fresh sensation of well-being.

**Ingredients:** Wheatgrass, Yarrow, Mint, Fennel.

**PRODUCT CODES**

Single-use: MONO02

6 filters: FILTRI02

10 filters: DOY02

Loose 1 kg: SFUSO02

# Neve/

SNOW

Its properties are derived from a combination of carefully selected ingredients:

- **Wheatgrass**: useful for the well-being of the kidneys and urinary tract, contributes to the health of the mucous membranes of the stomach and intestines. Promotes drainage of body fluids and has a purifying action on the body.
- **Yarrow** : supports digestive function and regular gastrointestinal motility, favouring the elimination of gas. It also contributes to the functionality of venous circulation and counteracts menstrual cycle disorders.
- **Mint**: promotes digestion, supports liver function and helps regulate gastrointestinal motility. It also contributes to the functionality of the respiratory tract.
- **Fennel** : Supports digestive function, regulates gastrointestinal motility and helps drain body fluids. It is also useful for combating menstrual cycle disorders and improving the fluidity of bronchial secretions.

This herbal tea is particularly suitable as a detoxifier and digestive aid, to be taken both before and after meals, but away from the night hours.

# Fumo/

SMOKE

A herbal tea with a strong character, in which the aromatic and fragrant notes of helichrysum flowers and lavender calyxes harmoniously combine with the bitter principles of olive and sage leaves. The typical grey-green colour and the beneficial and regenerating flavour of this blend contain all the emotions of a deep and healthy Mediterranean breath, for an intense taste experience.

**Ingredients:** Helichrysum, Sage, Lavender, Olive.

Single-use: **MONO03**

6 filters: **FILTRI03**

10 filters: **DOY03**

Loose 1 kg: **SFUSO03**

# Fumo/

## SMOKE

Its properties derive from a combination of carefully chosen and studied drugs:

- **Helichrysum** : supports digestive and hepatic function, contributes to the well-being of the nose and throat and offers a balsamic effect. It also promotes microcirculation function.
- **Sage**: a plant with a feminine character, useful as an oestrogen regulator. It helps combat menopausal disorders. It contributes to the regularity of the night sweating process and offers a tonic effect, both in cases of physical and mental fatigue.
- **Lavender** : with antispasmodic, calming and relaxing properties, it is useful for promoting sleep and counteracting stress. In addition, it supports normal mood and regular gastrointestinal motility, promoting the elimination of gas.
- **Olive** : supports carbohydrate and lipid metabolism, contributes to normal blood circulation and regular blood pressure. It also has a powerful antioxidant action.

This herbal tea is dedicated to those in search of relaxation and psychophysical well-being.

# Bosco/

FOREST

At the base of this herbal tea are all the most typical elements of the Etnean forest, in a blend that combines chestnut and wild bramble leaves, oak bark and flowers of the yellow broom, the plant that symbolises the volcano. With its tannic and astringent flavour, this herbal tea is excellent for warming up during autumn rains or on cold winter days, offering refreshment and vigour.

**Ingredients:** Chestnut, Bramble, Oak, Broom.

## FOREST

Its beneficial properties derive from the following ingredients:

- **Chestnut** : supports the respiratory system, promotes the fluidity of bronchial secretions and contributes to the regularity of intestinal transit. It also possesses antioxidant properties.
- **Bramble** : rich in beneficial nutrients, it contributes to the wellbeing of the throat and regularity of intestinal transit.
- **Oak** : useful for the wellbeing of mucous membranes and tissue trophism, supports regularity of intestinal transit.
- **Broom** : with its characteristic aroma, gives personality to the herbal tea. Together with bramble, it softens the flavour and contributes to the wellbeing of the cardiovascular system.

This herbal tea, recommended in winter, is ideal for vigour, protection, refreshment and acid-base balance, as well as supporting breathing. Its cold version in summer is also interesting.

# Sottobosco/

FOREST FLOOR

An infusion that speaks the language of Etna's undergrowth: rosehip for a lively touch of acidity, chopped hazelnut to bring warm toastiness, ivy with its enveloping herbaceous profile, and pine buds to lend freshness and gentle sweetness. A clear, harmonious cup, ideal on cold evenings for a warmth that remains light.

**Ingredients:** Rosehip, Hazelnut, Ivy, Pine.

## PRODUCT CODES

## FOREST FLOOR

Its beneficial qualities come from the following ingredients:

- **Rosehip:** naturally rich in vitamin C and antioxidants; supports the body's defences and lends a pleasant acidity to the infusion. Contributes to normal tone and energy during seasonal changes.
- **Toasted hazelnut:** a source of vitamin E and healthy fats; gives a warm, rounded, toasty profile, encouraging a feeling of satiety and comfort.
- **Ivy:** traditionally used for respiratory function; adds an enveloping herbaceous note. Helps you feel your breathing is freer, especially when the air is cold and damp. (Avoid during pregnancy/breastfeeding; follow recommended amounts.)
- **Pine:** balsamic with a lightly honeyed character; supports the wellbeing of nose and throat, leaving a fresh, gently sweet finish.

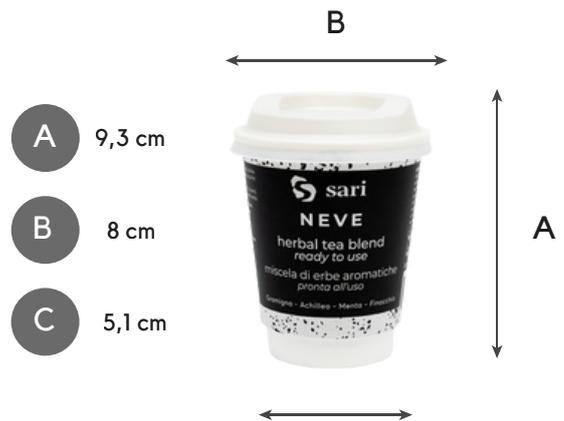

This herbal tea is recommended for autumn and winter for vigour, protection, and restoration, with a sensory profile balanced between acidity, toastiness, herbaceous notes, and sweetness.

# Packaging details

## Takeaway Cups

Our biodegradable paper cups are made of recycled paper with a special water-based coating instead of traditional plastic. This makes them biodegradable and compostable, so you can sip your drink while respecting the planet!

'AA Recyclable' means that our cups can be properly recycled at waste paper facilities, making the job of waste disposal personnel easier.

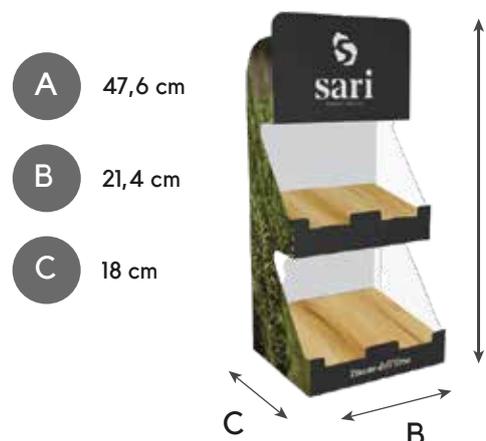

## Reclosable doypack

The new metallised recyclable film is an environmentally friendly product that at the same time retains all the protective characteristics of aluminium and its barriers: it protects the contents from gases and moisture and offers a high barrier to light. This excellent performance is enhanced by the eco-sustainable spirit of this material, which has passed the recyclability test carried out by Interseroh+ with flying colours, conforming to European standards.

## Two-shelf counter display

Our shelf displays are characterised by a lightweight but solid structure that can support the weight of the products.

AZIENDA AGRICOLA

[WWW.SARIAZIENDAAGRICOLA.COM](http://WWW.SARIAZIENDAAGRICOLA.COM)

We are a young Sicilian farm specialising in the cultivation, processing and trade of aromatic and medicinal herbs. We cultivate local varieties and species because we believe in the most typical biodiversity of Etna and the entire Mediterranean Macchia. We produce herbal teas and spices in various formats.
